

## Addendum 2

### Q&A:

1. Is a higher resolution PDF available for the blueprints.

- Higher resolution floor plans are available with camera configuration only. See link on Solicitation page.
- Please note:
  - Provided floor plans show the exact location for surveillance cameras and emergency communication help boxes.
  - The types of cameras depicted in the floor plans represent a suggestion. It is up to the bidder to select the best camera for each location having in mind the specific conditions such as: area to be covered, ceiling height, lighting conditions, etc. As stated in the RFP Scope of Work, the proposed system solution shall include camera selection criteria, to reflect resolution and other characteristics.
