

## Addendum 4

### Q&A:

1. Can you clarify the following:

- a. Page 35 of the RFP states that Level 1- First Floor, is due 31 cameras. Page 36 and the Blueprints detail only 30 visually in shown areas
  - b. The drawing shows 7 Fish, Attachment G states 5, which is correct?
- 
- a. The missing camera is depicted on the floor plan level 2, please see below picture and attached floor plan inside the red oval shape. It's included it on the first floor count, because it will be installed between floors 1 and 2 as all other exterior cameras depicted on floor plan level 1;
  - b. The floor plans goal is to show camera configuration (locations). The type of camera depicted on the floor plans should be considered as suggestions. As written in the RFP Statement of Work (Section 3.0 D. 10.), "The proposed video system solution shall include camera selection criteria, to reflect resolution and other characteristics". It is up to the bidder to select the type of camera, resolution, and other characteristic and explain the selection criteria.
