Eastern Virginia Medical School accepted its first class in September 1973. From 1973 until 1983 the M.D. program was 36 months in length. Beginning in 1983, the M.D. program length was extended to 4 years.

**TRANSCRIPT KEY (1973-1983)**

*The program leading to the M.D. degree at Eastern Virginia Medical School is 36 months in length and is composed of three phases. Phase I, 15 months in length, students acquire the fundamentals of basic sciences and physical diagnosis. Phase II students experience clerkships in six disciplines. Phase III is devoted entirely to selectives in basic and clinical sciences. Students are evaluated on their mastery of specified objectives in each organ system in Phase I, clinical clerkships in Phase II and selectives in Phase III. Each department may elect to submit written comments on student's individual performance. These comments are part of the transcript.*

**HONORS:** Awarded to those who elect to participate in advance objectives as designed by the individual department. The designation was discontinued as of January 1, 1976.

**COMPLETE:** Received when all objectives assigned by the department have been mastered.

**TRANSCRIPT KEY (1984-1986)**

*The program leading to the M.D. degree at Eastern Virginia Medical School is 36 months in length and is composed of three phases. Phase I, 15 months in length, students acquire the fundamentals of basic sciences and physical diagnosis. Phase II students experience clerkships in six disciplines. Phase III is devoted entirely to selectives in basic and clinical sciences. Students are evaluated on their mastery of specified objectives in each organ system in Phase I, clinical clerkships in Phase II and selectives in Phase III.*

**PASS:** Received when all objectives assigned have been mastered.

**FAIL:** Received when the student fails to meet the assigned objectives. The course may be repeated the following year.

**TRANSCRIPT KEY (1987)**

*The first year of approximately 40 weeks is presented in an integrated fashion to provide the students with a firm foundation in normal structure and function of the body. The second year of approximately 35 weeks provides the student with an understanding of the biology of disease, abnormal structure and function. During the third year, students rotate through 48 weeks of required clinical experiences (clerkships) in six disciplines. The final year consists of 12 weeks of required clinical experiences and 20 weeks of elective experiences. Students are evaluated on the achievement of course objectives and grades are assigned using a modified norm-reference system.*

**PASS:** Received when all objectives assigned have been mastered.

**FAIL:** Received when the student fails to meet the assigned objectives. The course may be repeated the following year.

**TRANSCRIPT KEY (1988-1989)**

*The first year of approximately 40 weeks is presented in an integrated fashion providing students with a firm foundation in normal structure and function of the body. The second year or approximately 35 weeks is also presented in an integrated fashion providing students with an understanding of the biology of disease, abnormal structure and function. During the third year, students rotate through 48 weeks of required clinical experiences (clerkships) in six disciplines. The final year consists of 8 weeks of required clinical experiences and 24 weeks of elective experiences. Students are evaluated on the achievement of course objectives and grades are assigned using a modified norm-reference system.*

**H =** Honors; Awarded for outstanding achievements  
**P =** Pass; Awarded for satisfactory performance  
**F =** Fail; Failure

*Remediation grades are restricted to Pass or Fail only.*

**TRANSCRIPT KEY (1990-1992)**

*The first year of approximately 40 weeks provides the student with a firm foundation in normal structure and function of the body. The second year of approximately 35 weeks provides students with an understanding of the biology of disease, abnormal structure and function, and pharmacology. During the third year, students rotate through 48 weeks of required clinical experiences (clerkships) in six disciplines. The final year consists of 5 weeks of required clinical experiences and 27 weeks of elective experiences. Students are evaluated on the achievement of course objectives and grades are assigned using a modified norm-reference system.*

**H=** Honors; Awarded for outstanding achievements  
**HP=** High Pass; Awarded for above average performance  
**P=** Pass; Awarded for satisfactory performance  
**F=** Fail; Failure  
**EX=** Exempt; Student exempted from course by examination  
**W=** Withdrew; Student withdrew from course

*Remediation grades are restricted to Pass or Fail only.*

**TRANSCRIPT KEY (1993 to present)**

*The first year of approximately 35 weeks provides the students with a firm foundation in normal structure and function of the body. The second year of approximately 35 weeks provides students with an understanding of the biology of disease, abnormal structure and function, and pharmacology. During the third year, students rotate through 48 weeks of required clinical experiences (clerkships) in six disciplines. The final year consists of 7 weeks of required clinical experiences and 25 weeks of elective experiences. Students are evaluated on the achievement of course objectives and grades are assigned using a modified norm-reference system.*

**AU =** Audit  
**H =** Honors; Awarded for outstanding achievements  
**HP =** High Pass; Awarded for above average performance  
**P =** Pass; Awarded for satisfactory performance  
**MP =** Marginal Pass (Grade assigned as of July 1, 1995)  
**F =** Fail; Failure  
**EX =** Exempt; Exempt from course by examination  
**W =** Withdrew; Withdrew from course

*Remediation grades are restricted to Pass or Fail only.*

*The face of this document has a colored background with the name of the institution repeated throughout. Use of solvents or oxidants to alter this document will discolor it or present the word void. To test, apply fresh liquid bleach to the face and it will turn brown. When photocopied, the word "COPY" should appear across the face. Fluorescent fibers become visible only when held under ultraviolet light. A ghost mark is visible on the back when held at an angle. A black and white document is not an original and should not be accepted. If you have further questions about the document or additional security features not listed, please contact our office at 757.446.5805.*
